The Little Book of
Hoops & Charms

ELIZABETH LOCKE
JEWELS

I did not invent hoops with charms! The Egyptians wore them as did the Etruscans, the Abyssinians and the Greeks. I would like to think, however, that I have helped to perfect them.

Our initial hammered 19k gold hoop was the ‘Small’ hoop which we introduced in 1993. It was an immediate success, as was our first charm, a white pearl with granulated cap. Clients asked me for a tiny hoop that could also hold the charms and thus was born our second offering, the ‘Baby’ hoop. Inevitably some women found the ‘Small’ hoop too big and the ‘Baby’ hoop too tiny and thus the ‘Big Baby’ hoop was created. Finally, at a show in Texas, I was besieged by women wanting a great big hoop and thus was born the ‘Giant’ hoop — not giant at all by mass market standards but the largest we can craft without unnecessary weight on the earlobe. Now you understand our odd names for the various sizes!

All of the hoops are completely handmade by one goldsmith Khun Chot.

Others through the years have attempted to match his skill in hoop-making but no one has his magic fingers. A signature of our hoops is the audible click you hear when the hoop is fastened. Many women wear them almost constantly— riding horses, playing golf and having their ears tugged upon by two year olds. They have been purchased for children and for nonagenarians and are never out of production which keeps Khun Chot very busy indeed!

They are the perfect travel earring. A single pair of hoops accompanied by a few pairs of charms and you will have a complete wardrobe of day to evening looks. They’re also great all by themselves. We now make over 75 different styles of charms, made in a wide selection of Venetian glass intaglio colors and different stone choices, giving you numerous options to choose from.

We hope you enjoy this little book showing the hoops with some of the many charms available.
